

## MAILGUN DOMAIN CONFIGURATION SETUP

1. Add your domain details in [mailgun](#)
2. Enter your SPF, CNAME , MX , DKIM , DMARC values in your DNS provider
3. Follow the DNS configuration setup for your name space provider check in this [link](#)
4. Once u entered the values from the mailgun to your namespace provider , the example values will be shown as below (make sure to click the verify DNS settings button once u configured )

tfmasters.com	MX	5 minutes	10 mxa.mailgun.org. 10 mxb.mailgun.org.
tfmasters.com	TXT	5 minutes	"v=spf1 include:mailgun.org ~all"
_dmarc.tfmasters.com	TXT	5 minutes	"v=DMARC1; p=quarantine; rua=mailto:dmarc@tfmasters.com; ruf=mailto:dmarc@tfmasters.com; sp=none; aspf=r; adkim=r"
email.tfmasters.com	CNAME	5 minutes	mailgun.org.
tfm_domainkey.tfmasters.com	TXT	5 minutes	"k=rsa; p=MIGfMA0GCSqGSIb3DQEBAQUAA4GNADCBiQKBgQDQPUMu UNjbiTwOW254VioL62WRBJOygQ+UGGRJLUywgmdwPXvXZvhy EjpbKQevPJ9PqyHe7aELJYRLPP4OpwO4npDWCRL1OXZsXkmPr E2jCNF7UB3TnCA8x+bzSmazK+OZ2LTnvWC8xb8/vwMFX5H0e9 OH8UEK5n+XVkvjOF2zQIDAQAB"

5. Follow the DMARC as mentioned in the above image or use the example as below either 1
  - a. **"v=DMARC1; p=quarantine; rua=mailto:dmarc@mydomain.com;  
ruf=mailto:dmarc@mydomain.com; sp=none; aspf=r; adkim=r"**
  - b. **"v=DMARC1; p=none; rua=mailto:dmarc@mydomain.com;  
ruf=mailto:dmarc@mydomain.com; sp=none; aspf=r; adkim=r"**
6. Once the entire configuration is done , double check your domain in this look up [url](#) for verification .
7. Now you're ready to rock and roll to send email , for example check [here](#)
